Set Up Guide

1. Connect Remote to Motor

Select appropriate channel to program pressing the LEFT and RIGHT buttons.

Press PROGRAM BUTTON on the motor receiver and hold until the motor jogs once.

2X

Press LEFT STOP button on remote until motor jogs twice.

2. Restoring Motor To Factory Settings

4X

Press PROGRAM BUTTON on the motor receiver and hold until the motor jogs 4 continuous times. This ensures the motor is restored to factory settings

---

NOTE: Before Programming Limit or Favorite Positions, ensure you are on the correct channel that corresponds to the shade you wish the remote to be programmed to.

Use the LEFT and RIGHT buttons to select the appropriate channel.

3. Setting Upper Limit Position

Press the DOWN and UP buttons to move the middle and bottom rails together until it reaches the headrail. Press the STOP button.

2X

Press the LEFT UP and LEFT STOP buttons until the motor jogs twice.
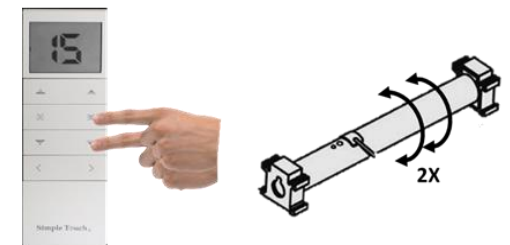

---

4. Setting Lower Limit Position

LOWER LIMIT MUST BE SET WITHIN 2 MINUTES AFTER COMPLETING UPPER LIMIT SETUP

Press the LEFT DOWN button to move the bottom rail down. Click the LEFT STOP button when you reach ordered drop height.

Press the RIGHT DOWN button to move the middle rail down. Click the RIGHT STOP button when you reach the bottom rail.

2X

Press the RIGHT DOWN and RIGHT STOP butt until the motor jogs twice.

Note: Channel "0" on the remote is the factory default "All" Button.
